Report pre projekt z ITS

Tomáš Sasák

April 23, 2019

1 Pôvodne neimplementované testy

Testy sú označené číslami a neskôr budú týmito číslami referované.

```
1.
Feature: Admin panel and features

Scenario: Display all registered customers
Given User is logged in as Admin
And There is atleast 1 registered customer
When Admin clicks Customers
Then All registered customers will show up

2.
Feature: Admin panel and features

Scenario: Display all orders
Given User is logged in as Admin
And There is atleast 1 order placed
When Admin clicks orders
Then All placed orders will show up

3.
Feature: Admin panel and features

Scenario: Admin logout
Given User is logged in as Admin
And is on admin page
When User logs out
Then User is logged out

4.
Feature: Overall Page

Scenario: Make an order
Given User is on the cart page
And user has some item in the cart
And user is logged in
When User checks out
And fills out correct info
And confirms order
Then Order is completed
And registered in database
```

2 Nalezené chyby a ich oprava

Test číslo 1. a 2. boli upravené, a to výmenou postupnosti prerekvizít (given príkazov), pre lepší význam a implementáciu testov. Test teraz vyzerá nasledovne.

```
Feature: Admin panel and features

Scenario: Display all registered customers
Given There is atleast 1 registered customer
And user is logged in as Admin
When Admin clicks Customers
Then All registered customers will show up

Scenario: Display all orders
Given There is atleast 1 order placed
And User is logged in as Admin
When Admin clicks orders
Then All placed orders will show up
```

Test číslo 3. bol upravený, a to vymazaním druhej prerekvizity (given príkazu), tieto dva kroky sú zabudované v sebe. Test teraz vyzerá nasledovne.

```
Feature: Admin panel and features

Scenario: Admin logout
Given User is logged in as Admin
When User logs out
Then User is logged out
```

Test číslo 4. bol upravený, a to prehodením prerekvizít pomedzi sebou pre lepší zmysel testu a lepšiu implementáciu. Test teraz vyzerá nasledovne.

```
Feature: Overall Page

Scenario: Make an order
Given User is logged in
And user has some item in the cart
And user is on the cart page
When User checks out
And fills out correct info
And confirms order
Then Order is completed
And registered in database
```

Pozn. Vo feature, `user.feature` bolo vymenené poradie testov `Correct password change` a `Incorrect password change`, lepší význam dáva testovanie nefunkčnosti a potom funkčnosti.
